

To help your GP provide you with even better care this GP practice, along with others in west Essex, is participating in a scheme that allows your GP health record to be linked with records other health professionals have about you.

The scheme allows only GPs to identify any patient(s) that might be 'at-risk'. For example, a patient who might need to be admitted to hospital in the near future or who could benefit from preventative care from specialists in NHS Community Services or from the voluntary sector.

If you have any concerns, questions, or do not want your

information being used in this way, please speak to your GP practice.

If you have already opted out of Summary Care Record or care.data programme your records will not be included.

Further information can also be found in the NHS West Essex CCG Fair Processing Notice which is on the website:
